

To,
ENERLYF

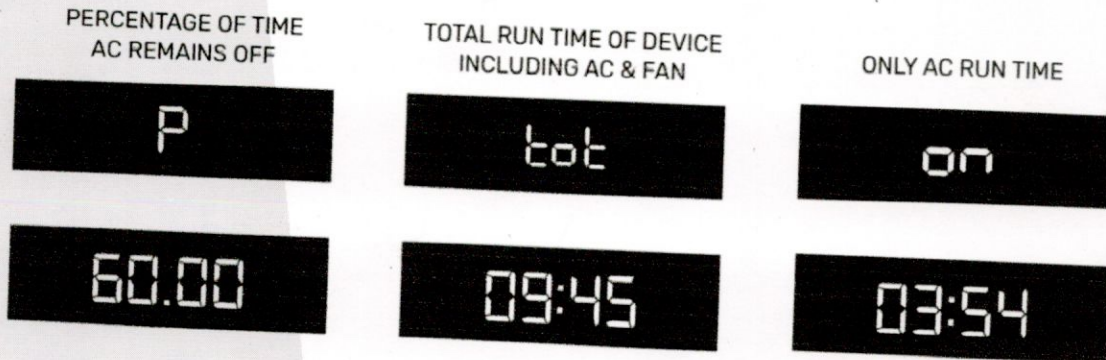

APPRECIATION REPORT
TO WHOM IT MAY CONCERN

This is to confirm that the ENERLYF Air Conditioner Energy saving device for Air conditioner installed at **Sentara Multispecialty Hospital, Ahmedabad Gujarat.**

The units were installed and commissioned in September 2019 in our all air-conditioned wards.

We have observed that after the surgical process or medical illness, the patient tends to feel more freezy in an air-conditioned environment. ENERLYF provides the best comfortable temperature in the room & reduces overcooling, which enhances the patient's comfort which in turns help them to cure fast.

It has analytics feature available on the device itself which provides accurate data of Air Conditioner usage.

We are delighted by co-operation provided by the ENERLYF team and satisfied with ENERLYF Air Conditioner Energy saver for air conditioners as it's very unique for technology and ease of monitoring & management.

ENERLYF's after-sales service is satisfactory. We appreciate the innovation of this technology and the **#SaveInIndia** initiative to reduce global warming through ENERLYF.
